

Zameshaev Mikhail

Quantitive research

Education

2023-2027 - HSE, Applied Mathematics and Informatics, head class
2020-2021 - Online courses on Data science and C++
2024-2025 - School of Quants The Experts
2021-2023 - Siberian School of Mathematics and Physics
2021-2023 - Tinkoff Education Algorithms
2022-2023 - Summer school on advanced Algorithms
2019 - Summer school on C++ development
2022 - Sirius camp on Algorithms and Data analysis

Accomplishments

2021-2023 - Regional stage in WRO in Siberia informatics - absolute winner
2022 - Teamed world Russian olympics - winner, 4th place
2022 - Regional stage Teamed WRO - absolute winner (participated alone)
2022-2023 - ITMO olympics in informatics - winner
2023 - Technocup olympics - winner
2023 - Innopolis olympics - winner
2021-2022 - Regional stage in WRO mathematics and physics - prize winner
2023 - Open olympics in informatics - prize winner
2021 - World Russian Robotics olympics Junior Skills - absolute winner
2023 - World Russian olympics - participant

Skills

Math

Deep knowledge in Probability Theory and Stochastic analysis

Finished MSU course on Probability and Basics of SA, took advanced courses in HSE on SA, visiting Vega institute for science seminars, currently studying statistics, SA and preparing for olympiads

Proficiency in Algorithms

Has won countless competitive programming contests, studied in best Russian competitive programming schools in head classes and teaching algorithms at Siberia, has written small projects on outer memory algorithms and parallel computing

Decent knowledge in complex mathematics

Finished one of the best Russian courses on Calculus, Linear algebra, Discrete mathematics, Number theory and Functional analysis, assisting first year and solving interesting problems, participating in math olympics

CS

Decent knowledge of C++, Python and Python libs

Finished HSE, and online courses on advanced C++ and Python, has written bunch of projects

Know how to apply ML and DL

Made a lot of projects, using

Projects

○ Implementation of C++ structures, idiomes and methods

Written all kind of smart pointers, vector and other sturctures, semaphores, thread optimized map, lockfree stack and bunch of other things

○ A bot for daily rated Codefroces participation

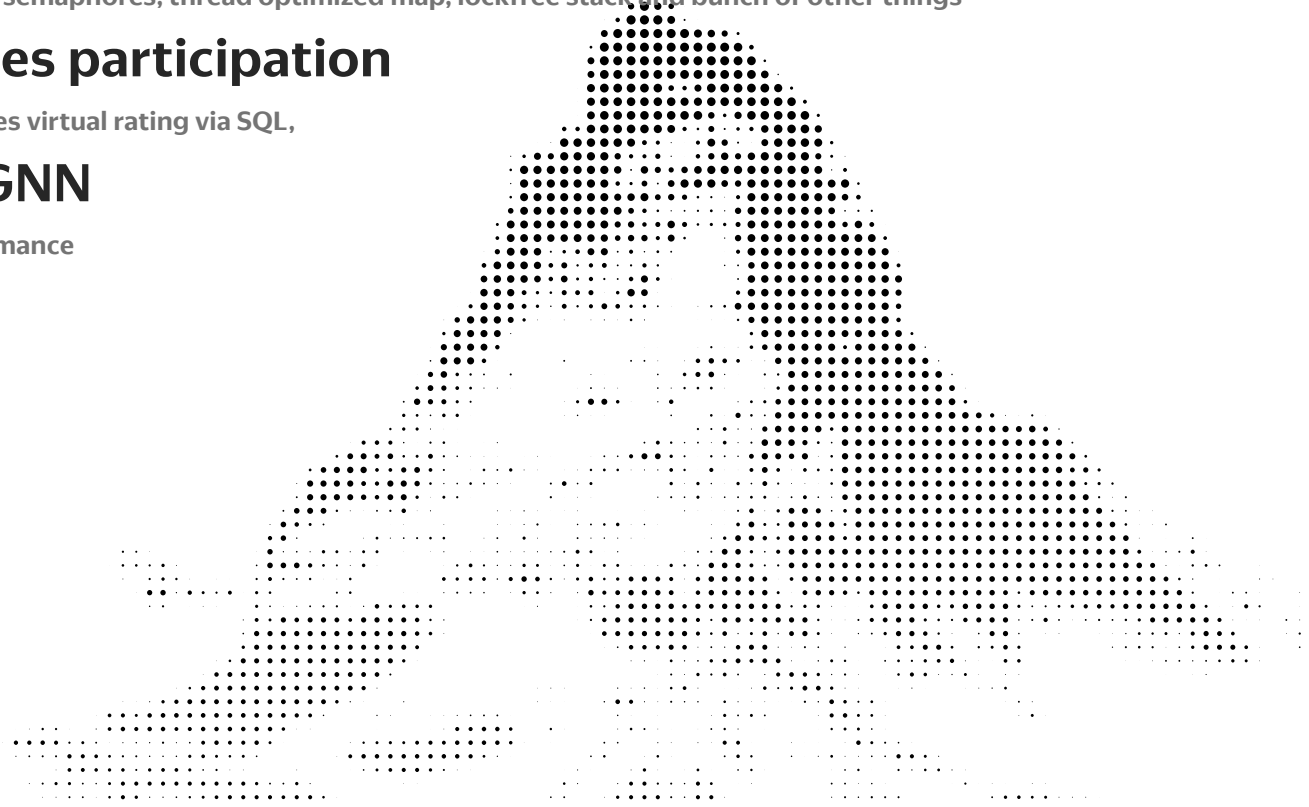

bot publicates a random high quality round from CF and changes virtual rating via SQL,

○ Analysis of time series using GNN

Applied SOTA models on Brain fMRI data to measure its performance

□ Also

- Represent HSE in rowing competitions
- Won a few Guitar competitions
- Started a program for school students to attend Siberian

University classes

– Doing sports and social activities as rest
